Fatent No. 6271006
GENERAL INFORMATION:
APPLICANT: Hubbs, John C.
TITLE OF INVENTION: Enzymatic Process for the Manufacture of TITLE OF INVENTION: Ascorbic Acid, 2-Keto-L-Gulonic Acid, and TITLE OF INVENTION: Ascorbic Acid, 2-Keto-L-Gulonic Acid, and NUMBER OF SEQUENCES: 3
CORRESPONDENCE ADDRESS:
ADDRESSEE: Eastman Chemical Company
STREET: P.O. Box 511
CITY: Kingsport
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  1378
